EARTH AGRO

FARMING

About Us

Earth Agro Farming specializes in agro-farming and vermiculture, focusing on producing high-quality organic fertilizer through earthworm farming, commonly known as kechuwa farming. This eco-friendly and sustainable approach addresses the growing need for organic solutions in agriculture while promoting soil health and reducing the dependency on chemical fertilizers by Earth Agro Farming.

Vision & Mission

01. Vision

Our vision at Earth Agro Farming is to become a leading force in sustainable agriculture, promoting eco-friendly and organic farming practices that enhance soil fertility, increase crop yields, and contribute to the overall health of the planet. We strive to revolutionize the agricultural sector by making vermiculture and organic fertilizer accessible to farmers worldwide, fostering a greener, healthier, and more sustainable future for generations to come.

02. Mission

Our mission is to provide sustainable, eco-friendly organic fertilizers through earthworm farming, empowering farmers to improve soil health and crop yields. We aim to reduce reliance on chemical fertilizers, promote environmental conservation, and educate farmers on the benefits of organic, regenerative agriculture.

What is Vermicompost?

Vermicompost is a type of organic fertilizer produced through the decomposition of organic waste by earthworms. It is rich in nutrients and beneficial microorganisms, making it an ideal soil conditioner and natural fertilizer for plants. The process of creating vermicompost is called vermicomposting, where earthworms digest organic materials, breaking them down into smaller, nutrient-rich particles.

Percentage Of Demands
